The Science of Early Childhood Development

Core Concepts of Development • Child development is a foundation for community development and economic development, as capable children become the foundation of a prosperous and sustainable society • Brains are built over time • The interactive influences of genes and experience literally shape the architecture of the developing brain,

Chapter 2: Biological Beginnings

evidence of sociocultural causal mechanisms Just because a child of a depressed mother becomes depressed does not demonstrate that being raised by depressed mothers is itself depressing That child might have become depressed regardless of the environment due to the influence of the mother's genes
