environment's dynamics, and then planning with respect to the learned model Typically, these models have either focused on reconstructing the true environmental state [8, 16, 24], or the sequence of full observations [14, 20] However, prior work [4, 14, 20] remains far from the state of the art in visually rich domains, such as Atari 2600

CHAPTER FOURTEEN Spatial Econometrics
Spatial Econometrics Luc Anselin* 1INTRODUCTION Spatial econometrics is a subfield of econometrics that deals with spatial interac-tion (spatial autocorrelation) and spatial structure (spatial heterogeneity) in regres-sion models for cross-sectional and panel data (Paelinck and Klaassen, 1979; Anselin, 1988a) Such a focus on location and

DEPARTMENT OF THE INTERIOR How to construct seven paper ...

scale, the models assume total displacement somewhere in the neighborhood of 4Q feet or 12 meters To make the models more realistic, some of the fault scarps are cut by gullies and are eroded in ways indicative of an arid landscape All of the paper models show displacement on the fault by the use of arrows and by the
